PROFESSIONAL SUMMARY

Detail-oriented Android Developer and U.S. Navy Veteran leveraging Kotlin, Java, and React Native to design and deploy robust, user-centric mobile applications. Proven track record of relational database management, query optimization, and cross-functional technical problem-solving in high-stakes operational environments. Fully certified in native Android development and equipped with a strong background in frontend architectures to deliver seamless, high-performance mobile solutions.

PROFESSIONAL EXPERIENCE

Northwestern University – Wildcard IT Support	Aug. 2024 – PRESENT
--	----------------------------

Maintains operational integrity of high-availability software/hardware infrastructure for university access control and identity card production.

Collaborated with vendors and internal departments to diagnose performance bottlenecks, driving a 50% increase in system processing efficiency.

Maintains and queries an internal SQL database holding over 100,000 distinct user records; executed efficient data insertions.

UW Health – Patient Scheduling Coordinator	Nov. 2021 – Sept. 2022
---	-------------------------------

Coordinated complex scheduling lifecycles for over 100 patients monthly utilizing enterprise EPIC HealthLink infrastructure.

U.S. Navy – Electronics Technician	June 2008 – June 2014
---	------------------------------

Supervised preventative and corrective hardware/software maintenance operations for mission-critical telecommunications systems.

Streamlined maintenance workflows onboard the U.S.S. George Washington, increasing division efficiency by 33%.

TECHNICAL SKILLS

Mobile:
Kotlin, Java, React Native, Android SDK, Android Studio, Gradle, XML Layouts, UI/UX State Management

Web:
HTML5, CSS3, JavaScript, Vue.js, Node.js, Express.js, React

DB & Tools:
SQL, SQLite, Room DB, Git, GitHub, MongoDB

Methodologies:
Agile/SCRUM, Project Management, Technical Troubleshooting, Leadership

EDUCATION

Northwestern University
Post-Baccalaureate Certificate (Digital Content, Programming, Web Dev)
Mar. 2023 – Aug. 2025

University of Hawaii at Manoa
B.A. Korean for Professionals & Second Language Studies
Aug. 2014 – June 2019

CERTIFICATIONS & AWARDS

Certifications:

- Android Developer with Kotlin (June 2026)
- Front-End App with React - Codecademy (April 2025)

Awards:
Honorable Discharge, U.S. Navy

Languages:
Korean (Conversational)

TECHNICAL PROJECTS

Photo Editor Application — Native Android (Kotlin, XML)

Engineered a native Android photo editing app utilizing Kotlin and optimized Android SDK image-processing capabilities. Implemented responsive, modern UI/UX principles via XML layouts, ensuring a highly intuitive user interface.

Woofstagram — Mobile App Dev (React Native, JavaScript)

Developed a multi-page social media mobile application leveraging React Native framework for cross-platform compatibility. Designed a modular component hierarchy and managed complex global state to mimic real-time activity feeds.

Jammming — Front-End Project (React, REST APIs)

Built a dynamic web application utilizing the React framework to communicate directly with third-party RESTful architectures. Implemented OAuth 2.0 authorization flows to safely acquire user credentials for custom Spotify API data manipulation.
