PROFESSIONAL SUMMARY

Certified Android Developer and U.S. Navy veteran leveraging Kotlin, Java, React Native, and AI development tools to engineer user-centric mobile applications. Proven track record of operational discipline in database optimization, frontend architecture, and technical problem solving.

PROFESSIONAL EXPERIENCE

Northwestern University – Wildcard IT Customer Support Specialist	Aug. 2024 – PRESENT
Maintain operational integrity of high-availability infrastructure for identity card production and specialized printer maintenance. Collaborated with vendors and internal departments to diagnose performance bottlenecks, driving a 50% increase in efficiency. Maintain and query internal SQL databases with 100,000+ records; execute efficient data insertions and reporting.	
<i>Program Assistant (Oct. 2022 - Aug. 2024)</i> Managed high-volume ID card production and provided administrative support that streamlined daily office operations.	
UW Health – Patient Scheduling Coordinator	Nov. 2021 – Sept. 2022
Coordinated complex scheduling lifecycles for over 100 patients monthly utilizing enterprise EPIC HealthLink infrastructure.	
U.S. Navy – Electronics Technician	June 2008 – June 2014
Supervised preventative and corrective hardware/software maintenance for mission-critical telecommunications systems. Streamlined maintenance workflows onboard the U.S.S. George Washington, increasing division efficiency by 33%.	

TECHNICAL SKILLS

Mobile: Kotlin, Jetpack Compose, Android SDK, MVVM, Java, React Native, Gradle, XML Layouts

Web: HTML5, CSS3, JavaScript, React, Vue.js, Node.js, Express.js

Tools & AI: SQL, SQLite, Room DB, MongoDB, Git, Vercel, Gemini Code Assist, GitHub Copilot, Claude Code

Methodologies: Agile/SCRUM, Project Management, Technical Troubleshooting, Leadership

TECHNICAL PROJECTS

Shopping List Android App — *Native Android (Kotlin, Jetpack Compose, Navigation Compose)*

- Built a native Android client for a REST API using Retrofit and MVVM architecture (ViewModel, StateFlow).
- Implemented robust state management for loading/success/error handling and verified functionality with comprehensive unit and UI tests.

Shopping List (Full-Stack Web) — *MEVN Stack (Vue 3, Express.js, MongoDB, Node.js)*

- Built a full-stack shopping-list app supporting multiple lists with full CRUD, item check-off, bulk removal, client-side routing (vue-router), and a dark/light theme.
- Developed an Express.js + MongoDB REST API consumed by the Vue frontend through an Axios service layer - the same backend later reused by a native Android client.
- Collaborated on a 4-person team using Git/GitHub for version control and coordination.

Woofstagram — *Mobile App (React Native, JavaScript)*

- Developed a multi-page social media app using React Native for cross-platform compatibility.
- Designed a modular component hierarchy and managed complex global state to mimic real-time activity feeds.

Jammming — *Front-End (React, JavaScript, REST APIs)*

- Engineered a dynamic web app in React that communicates directly with third-party RESTful services.
- Implemented OAuth 2.0 authorization flows to securely acquire user credentials for custom Spotify API data.

Reddit Mini — *Front-End (React, JavaScript, REST APIs)*

- Deployed a responsive, modular React app via Netlify and Vercel that interfaces with the Reddit API for live data.
- Built client-side architecture adhering to platform rate-limited and OAuth data-throttling policies.

EDUCATION

Northwestern University – Post-Baccalaureate Certificate (Digital Content Management, Programming & Web Development)	2023 – 2025
University of Hawaii at Manoa – B.A. Korean for Professionals	2014 – 2019

CERTIFICATIONS & LANGUAGES

Android Developer with Kotlin: Hyperskill (2026); **Front-End App with React:** Codecademy (2025)

Languages: Korean (Conversational)
