PROFESSIONAL SUMMARY

Certified Android Developer and U.S. Navy Veteran leveraging Kotlin, Java, React Native, and AI development tools to engineer user-centric mobile applications. Brings a proven track record of operational discipline to database optimization, frontend architecture, and cross-functional technical problem-solving.

PROFESSIONAL EXPERIENCE

Northwestern University – Wildcard IT <i>Customer Support Specialist</i>	Aug. 2024 – PRESENT
--	----------------------------

Maintain operational integrity of high-availability software/hardware infrastructure for university access control and identity card production.

Collaborate with vendors and internal departments to diagnose performance bottlenecks, driving a 50% increase in system processing efficiency.

Maintain and query an internal SQL database holding over 100,000 distinct user records; executed efficient data insertions.

UW Health – Patient Scheduling <i>Coordinator</i>	Nov. 2021 – Sept. 2022
---	-------------------------------

Coordinated complex scheduling lifecycles for over 100 patients monthly utilizing enterprise EPIC HealthLink infrastructure.

U.S. Navy – Electronics Technician	June 2008 – June 2014
---	------------------------------

Supervised preventative and corrective hardware/software maintenance operations for mission-critical telecommunications systems.

Streamlined maintenance workflows onboard the U.S.S. George Washington, increasing division efficiency by 33%.

TECHNICAL SKILLS

Mobile:

Kotlin, Java, React Native, Android SDK, Android Studio, Gradle, XML Layouts, UI/UX State Management

Web:

HTML5, CSS3, JavaScript, Vue.js, Node.js, Express.js, React

DB & Tools:

SQL, SQLite, Room DB, Git, GitHub, MongoDB

Methodologies:

Agile/SCRUM, Project Management, Technical Troubleshooting, Leadership

EDUCATION

Northwestern University

Post-Baccalaureate Certificate (Digital Content, Programming, Web Dev)
Mar. 2023 – Aug. 2025

University of Hawaii at Manoa

B.A. Korean for Professionals & Second Language Studies
Aug. 2014 – June 2019

CERTIFICATIONS & AWARDS

Certifications:

- Android Developer with Kotlin - Hyperskill (June 2026)
- Front-End App with React - Codecademy (April 2025)

Awards:

Honorable Discharge, U.S. Navy

Languages:

Korean (Conversational)

TECHNICAL PROJECTS

Photo Editor Application — Native Android (Kotlin, XML)

Engineered a native Android photo editing app utilizing Kotlin and optimized Android SDK image-processing capabilities.

Implemented responsive, modern UI/UX principles via XML layouts, ensuring a highly intuitive user interface.

Woofstagram — Mobile App Dev (React Native, JavaScript)

Developed a multi-page social media mobile application leveraging React Native framework for cross-platform compatibility.

Designed a modular component hierarchy and managed complex global state to mimic real-time activity feeds.

Jamming — Front-End Project (React, REST APIs)

Built a dynamic web application utilizing the React framework to communicate directly with third-party RESTful architectures.

Implemented OAuth 2.0 authorization flows to safely acquire user credentials for custom Spotify API data manipulation.

Reddit API Project — Front-End Project (React, REST APIs)

Engineered a responsive, modular React application deployed via Netlify that interfaces with the Reddit API to parse live data streams while strictly adhering to secure rate-limiting policies.
